RAISING THE BAR ON INDUSTRY STANDARDS Pacbrake Launches Their Air Suspension Product Line

BLAINE, WA - Pacbrake Co., long-time manufacturer and supplier of engine and exhaust brakes, has just released a new line of air suspension products for light-duty trucks.

Pacbrake Air Suspension Kits provide drivers with added support and better control for an overall smoother, safer ride. Made with 2-ply rubber, the double convoluted air springs solve many everyday towing and hauling problems, such as vehicle sag, sway and bottoming out.

With a limited number of air suspension providers in North America, Pacbrake saw an opening to engineer a product that would exceed current industry air spring performance and quality. "We have been asked several times to develop an air suspension line," says VP of Engineering, Gabi Gavril. "In looking at existing products on the market, we could see definite areas for improvement."

Gavril believes Pacbrake air springs are far superior to the competition. "The end caps won't crack like plastic, or rust like steel. And our mounting brackets are powder coated with two-tone textured coating, giving them better corrosion protection and an appealing appearance."

Pacbrake air springs feature 1" thick, solid aluminium end caps and 18 steel support wires, twice that of the leading competitor. These innovations extend the life of air springs and provide superior performance for truck owners.

Pacbrake Air Suspension Kits are available through their network of authorized dealers and are backed by one of the best warranties in the industry. For more information about Pacbrake automotive products, visit www.pacbrake.com or call 800.663.0096.

Pacbrake is an award-winning manufacturer and supplier of cutting edge vehicle technologies. They have engineered solutions for many vehicles, including RVs, light-, medium-, and heavy-duty trucks. From their flagship PRXB Exhaust Brakes to their new line of Air Suspension products, Pacbrake is leading the way to a better, safer ride.
